## ***NEW MAP OF THE WORLD IS MOST AWAITED ALBUM OF THE YEAR***

"Coming to America is just the next phase for us. It's not necessarily just our dream. Our main dream has always been to follow God and to love others. America's just the next venue for us to keep doing what we've always done." (Paul Colman Trio)

PC3's new album *New Map of the World* is the most awaited album of the year.

This outstanding album contains definitive versions of the songs that have dominated the Australian/NZ airwaves with relentless success over the past three years - songs like *Fill My Cup*, *Your Sweet Voice*, *Turn*, and *The Killing Tree*.

*New Map of the World* also includes several new songs - *Save My Soul* (only available on the Australian/NZ release), *Love Me More*, *Let Love Grow* and *Lullaby*, plus the first studio recordings of *Africa* and *Selfish Song*.

### **New radio single**

The enclosed Radio Resource Disc highlights the first radio single *Save My Soul* and a recorded spoken introduction that you're invited to air.

### ***New Map of the World* radio special**

The *New Map of the World* radio special is in two parts.

The first talks about PC3's experiences in the US touring with Third Day, the tim tam slam, fun showcases, getting a record deal, recording the new album, and finally scoring a Top 10 hit in the States. (Last week, *Turn* hit the top spot!) In typical PC3 style, this is fun!

The second part (a little more serious) primarily focuses on the new songs and the new album. It is an important message from the guys in America to their valued supporters.

### **Thank you**

The 'world' has expanded for the trio and their families this year, but without your help playing their songs, playing their radio specials, and interviewing the trio, this ministry would have never expanded at the rate it has. PC3 and I would like to thank you for your continued support and regular prayers.

Warm regards,

Wes Jay
